Initial Commands

- Building docker image using the dockerfile

```
docker build -t fastapi-docker-app .
```

- Run the container

```
docker run -d -p 8000:8000 fastapi-docker-app
```

- Now you have:

  - http://localhost:8000/docs#/ for the root route of FastAPI app

  - http://localhost:8000/ the **Swagger UI** auto-generated by FastAPI to explore/test API interactively.

Github

```
git init
git add .
git commit -m "Initial commit: Basic setup"
git remote add origin <link>

git branch -M main
git push -u origin main
```
